

2019 Annual Report

Words from our CEO, Ben Harrington

The Board of Directors and I are proud to share this annual report celebrating our accomplishments in 2019. The efforts of our dedicated volunteers, staff and generous donors working together to promote mental health awareness, wellness and recovery in our communities reaps huge results.

Growth opportunities made it possible this year to hire new staff and expand services to include the Chattanooga, Knoxville, and Tri Cities areas. The Mental Health Association is dedicated to the promotion of mental health awareness, wellness and recovery in our communities. The Mental Health Bell, the symbol of all Mental Health America “rings out hope for improving mental health and achieving victory over mental illnesses.” Nowhere does the peal of the bell ring louder than right here in East Tennessee. Together we will fight in the open to help our friends, neighbors and family to overcome mental illnesses and addictions. Thank you for all your support!

Our Mission

The Mental Health Association of East Tennessee is dedicated to the promotion of mental health awareness, wellness and recovery in our communities.

OUR SERVICES

**PSYCHIATRIC
SYMPOSIUM**

B4STAGE4

**WORKSITE CLASSES
AND SEMINARS**

**MENTAL
HEALTH 101**

**MENTAL HEALTH
SCREENINGS**

**PEER RECOVERY
CALL CENTER**

OUR GOALS

To promote mental health awareness, wellness and recovery in our communities.

To provide essential mental health education in middle & high schools.

To provide client services & peer support which promote resiliency and recovery.

To advocate for and build a behavioral health system which is responsive to the needs of its citizens and community.

screenings

3

3,177

 screenings taken this year

Screenings provide a quick, free, and anonymous way to identify whether individuals may be experiencing symptoms commonly associated with an illness or addiction and determine whether follow-up with a professional is needed.

Nearly two thirds of those struggling with a diagnosable condition do not get the treatment and support that would help them recover.

tested positive

for a mental health issue

With the help of our free screenings, clients are developing a new-found awareness for their mental health. Almost all individuals who tested positive state they will seek treatment. We couldn't ask for more!

94.6%

will seek treatment

MENTAL health FACTS

Did you know...

50 % of all individuals with a mental illness began showing symptoms by the age of 14.

88%

Nearly 1 in 5

American adults will have a diagnosable mental health condition in any given year.

24.6 million adults

with mental illness do not receive any mental health treatment.

44 million

US adults suffer from a mental illness.

PEER RECOVERY call center

Our knowledgeable staff helps East Tennessee find treatment, support or other resources which best fit their needs, location, and insurance status.

86%

requested FOLLOW-UPS
& monthly support

why it matters...

REAL STORIES FROM REAL CLIENTS

“In desperation I called the Peer Recovery Call Center. A calm voice answered the call. My son who has autism was struggling with social anxiety and was unable to function. The Peer Recovery Specialist helped us navigate the confusing medical maze by providing resources here in Knoxville. With encouragement and support from the call center he has successfully completed WRAP training and has held a full-time job for the last year and a half.” - Sylvia, Call Center Client

“THANK YOU so much for caring enough about me to keep checking on me.” -

Matt, Call Center Client

“With every call I feel better, more **CONFIDENT**, and a happier person.”

- Valerie Call Center Client

PSYCHIATRIC symposium

Each year we provide a continuing-education opportunity for physicians, nurses, psychologists, social workers, and other licensed mental health professionals. At the symposium we provide an opportunity to earn 6 CME/CE Credits each day as our attendees partake in lecture series, workshops, and classes taught by the nation's top behavioral health professionals.

MENTAL health 101

MENTAL HEALTH education for the NEXT GENERATION

WE VISITED...

over 100 schools and taught over 30,000 students in one year! Mental Health 101 continues to spread across Tennessee at a rapid pace. Students are eager to learn about mental health. Our outcome

data shows significant gains in demonstrable knowledge of mental illness signs and symptoms, symptom duration, suicidal behaviors, and how to intervene.

33,998

students taught

what happens AFTER CLASS?

11% more kids can identify a sign of a mental health problem.

18% more kids can identify suicide warning signs.

61% more kids can identify the correct amount of time needed to experience symptoms before getting help.

why it matters...

Robert participated in a Mental Health 101 course when he was in the sixth grade. He talked with the presenter after the lesson and shared that he could relate to 5 of the symptoms listed for depression. She connected him with his school counselor who worked with his parents to get him to professional counseling. 3 years later he says, "I just wanted to say thank you. This program really helped me. It helped me realize I was experiencing depression and helped me get on the right path for some help".

An illustration featuring a blue background with a vertical white line down the center. On either side of the line, several hands are shown reaching upwards, each attached to a thick, golden-yellow arm. The hands are white with simple black outlines. The background is filled with small, colorful confetti pieces in shades of blue, green, yellow, and pink. The overall theme is one of gratitude and celebration.

THANK *You!*

Our wonderful sponsors, volunteers, and donors allow us to give the East Tennessee area the care and resources they deserve. We could not be more grateful for everyone who has lent a helping hand this year!

Thank you to all!
